INTRODUCTION

Mercy Relief is a globally recognized humanitarian organization dedicated to providing emergency aid and promoting sustainable development in disaster-affected communities. Our projects focus on alleviating suffering, improving living conditions, and empowering vulnerable populations to build a more resilient future.

MOVE (Mercy Overseas Volunteer Expedition) is our exclusive program designed to engage corporate entities in first-hand experiences of Mercy Relief's sustainability projects. Through MOVE, your employees can actively participate in meaningful CSR efforts, fostering team building, skills development, and a deeper understanding of the challenges faced by disaster-affected communities.

Community Engagement

Participants will work alongside Mercy Relief's dedicated team to engage with local communities and understand their needs, challenges, and aspirations. This interaction will promote cross-cultural exchange and empathy.

Sustainable Projects

Participants will have the opportunity to contribute their skills and knowledge to support ongoing sustainability projects especially in areas such as water and sanitation, shelter, education, or livelihood development.

Team Building

The MOVE expedition will serve as an exceptional team-building experience, fostering camaraderie, trust, and cooperation among participants making it a truly memorable and impactful journey.

Fundraising (Optional)

In the spirit of giving back, participants may consider engaging in fundraising initiatives to support Mercy Relief's projects in the visited community. This will not only provide crucial financial assistance but also create a sense of shared purpose among Emerson's employees.

BENEFITS

Enhanced Employee Morale

The opportunity to actively participate in a meaningful CSR initiative will boost employee morale and pride in working for a company that values social responsibility.

Strengthened Team Dynamics

Through collaborative efforts in a challenging environment, employees will develop stronger bonds and cohesive team dynamics that will positively impact their work performance.

Public Relations and Brand Image

Participation in MOVE will demonstrate your organisations's commitment to sustainable CSR initiatives, enhancing our reputation as a responsible corporate citizen.

Personal Development

Employees will have the opportunity to acquire new skills and perspectives, benefiting their personal and professional growth.

INVESTMENT

We will work with you on an estimated budget for the MOVE expedition, including airfare, accommodation, program fees etc. However, it is important to bear in mind that budgeting will largely depend on the specific requirements of the expedition, number of participating employees, prevailing airfare and accommodation rates.

The **MOVE** initiative presents an unparalleled opportunity for your organisation to engage in a transformative CSR experience while making a tangible impact on disaster-affected communities. In collaboration with Mercy Relief, we can create a lasting legacy of positive change and empowerment.

ABOUT US

Inaugurated in 2003, Mercy Relief is Singapore's leading disaster relief management organization, focused on delivering aid and sustainability programs to communities affected by natural disasters.

Our primary goal is to alleviate suffering and help such communities recover and rebuild in the aftermath of disasters. Our sustainability programs extend across Asia Pacific focusing on water and sanitation, healthcare, education, shelter, and sustainable livelihood programs.

Over the last two decades, Mercy Relief has earned a reputation for its effective disaster management programs. Through partnerships, donations, and volunteer efforts, we continue to work towards building a better and more sustainable future for vulnerable communities.
